

CitizenSalmon

Run by a citizen science group in Seattle, USA, this project aims to identify the origins of 50 Chinook salmon populations and create a database of salmon genotypes. The driving motivation is to better understand populations and recovery efforts of these animals with highly complex life histories.

Suitable	Yep!
Organism	Chinook salmon (<i>Oncorhynchus tshawytscha</i>)
Substrate	DNA
Full Genome	No
Genome size	~2.4 Gb
Reference available	Yes
